Notifybuddy amoled apk

Lost LED notifications on your phone!? Don't worry, i'll be right back. Although this is tested on OP6T, it may be working for most Oreo Android Phones and later. So I was annoyed at not having an LED notification light on the OnePlus 6T so I tried to make one of mine. As the OP6T has amoled screen whenever a desired notification comes the app brings a black screen with LED warning looking animation. To use it: 1. Turn off the Ambient Display and any battery optimization for the app. Give permission to access the notification. 3 Select the apps for which you want notifications by choosing a Note color: When you successfully select a color for an app, the text in which the app name is written should change to that color that it ☹.
